15	6/4/2013	9/19/2013	1. Children in the infant room sat in their bucket seats for over an hour. They were observed playing with table toys and watching tv. The children were removed from the bucket seats to wash hands for lunch and then returned back to the bucket seats to eat. After that the children were put down for nap. Ensure that the children are given activities which are both active and nonactive. Theses activities should be scheduled so that the children are not seated for too long. 2. Ensure that the staff provide transitional activities for the children. Children were made to wait for lunch for over 15 minutes without staff interacting with them other than to tell the children to sit down and wait. 3. Ensure the staff have alternate activities for the children who do not want to participate in the activity presented to the class. Children cannot be forced to participate in the activity if they are not interested. Staff were overheard telling the children to come back to the area where the activity was being conducted and not to go into another area because that area was closed. retrain all staff and submit retraining document to OOL with staff signatures.
